

You're paying SharePoint prices for files that just need somewhere to live.

StoreX gives your organisation organised, searchable file storage on your own Azure subscription -- at a fraction of what Microsoft charges for extra storage. No per-seat licences. No Microsoft 365 required.

EXTRA SHAREPOINT STORAGE

~\$0.20/GB/mo

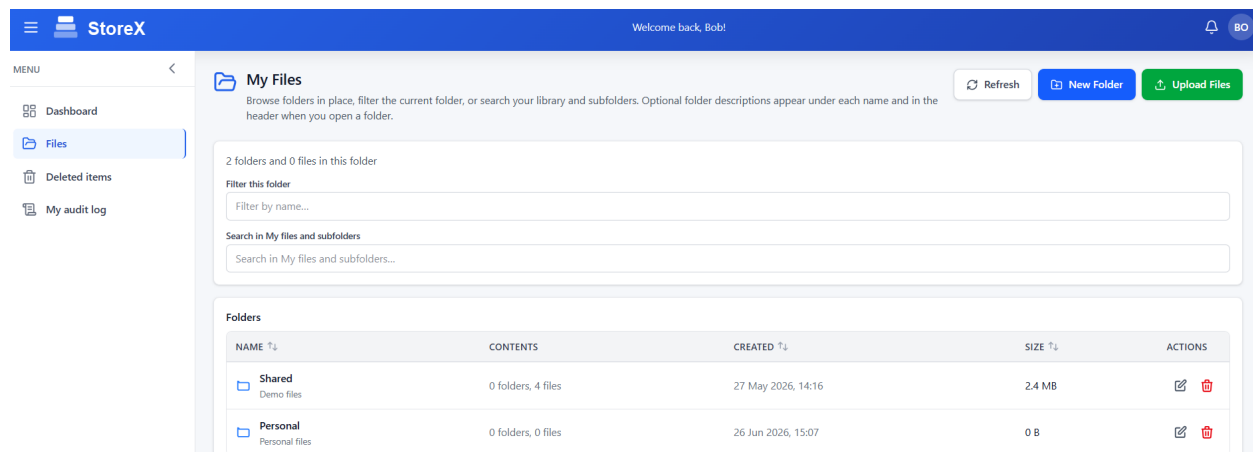

Microsoft 365 add-on pricing

STOREX ON AZURE

~\$0.01-0.02/GB/mo

Roughly 10-20x cheaper than SharePoint

Storing 5TB of files? The difference pays for StoreX and then some. We'll model it for your actual volume.

WHAT STOREX DOES

- Upload from any browser, any device -- into folders your admin sets up from day one
- Search your entire library instantly -- no asking a colleague where the file is
- Set per-person storage limits so one user can't consume the whole quota
- Recover deleted files -- nothing is gone until you say it's gone
- Activity log included -- who uploaded, moved, or deleted what, and when

WHERE ORGANISATIONS USE IT

Archiving from SharePoint - Field photos and site evidence - Marketing and media assets - Any team with files that have outgrown their current home

PRICING

From R5,000/month

Platform fee -- software, deployment & ongoing management. Fixed monthly.

Azure storage rates on top at cost. Typically R5,500-R7,000/month total. No per-seat fees. No hidden tiers.

HOSTED IN YOUR AZURE SUBSCRIPTION

We have no access to your files.

External users supported.

One organisation per deployment.
